1. Please list any budget/accounting/finance training materials and/or courses that you have developed and used in the last three to five years.

Title

Format (manual, cd-rom, etc.)

We have not developed or used any in the last three years. The only training attended relates to our new financial software product, PeopleSoft. This training related to learning features and functionality.

Our corporation has developed "Green Belt" training classes. These classes are a consistent methodology to look at administrative and production processes. The point is to identify and remove or improve non-value added steps thereby improving the process and reducing the cost of doing business.

2. What budget/finance/accounting training do you feel are your biggest needs?

Additional information on the BMIS structure and the impact it will have on financial systems.

3. Have you used any outside sources for financial training? If so, please list any financial management training courses (budgeting, accounting, etc.) you would recommend to others in the DOE financial community. (Also include any non-finance classes that you found to be very good!)
